

Participants: Akshay Patel | Hannah Claflin | Surya Krishnan | Cameron Bourque | Luke Ledbetter

Team 31 - CineMeet

April 21, 2020

Start: 4:20 pm

End: 4:32 pm

Sprint 3 Scrum Meeting 1:

Akshay

- I was working on generalizing the dashboard. Combining the create virtual and create physical. Same thing for the view listings.

Luke:

- I added the remove a friend button and matched it to the add a friend.

Cameron

- I added the edit button and created the page for editing the listing.

Hannah

- I implemented the navigation bar so that the user can easily navigate pages without using the dashboard.

Surya

- I was able to get part of the backend for the Tumblr API and CineMeet blog working and then Akshay helped integrate the process into the website.

Sprint 3 Scrum Meeting 2:

Participants: Akshay Patel | Hannah Claflin | Surya Krishnan | Cameron Bourque | Luke Ledbetter

Team 31 - CineMeet

April 23, 2020

Start: 5:10 pm

End: 5:24 pm

Akshay

- Grabbed the backend code from Surya and integrated it with creating a listing so that the post gets made on the Tumblr blog as well.

Luke

- updated the header to help explain what the purpose of adding a friend was for.

Cameron

- I finished setting up the edit page and added the save and delete options.

Hannah

- I made the navigation bar have dropdowns so that it is less cluttered and easier for the user to use. I also switched the fonts to Calibri so that site is more user friendly.

Surya

- I created a note on the create virtual listing page. This description will explain to the user what a virtual listing is.

Sprint 3 Scrum Meeting 3: **RECORDED MEETING**

Participants: Akshay Patel | Hannah Claflin | Surya Krishnan | Cameron Bourque | Luke Ledbetter

Team 31 - CineMeet

April 27, 2020

Start: 6:31 pm

End: 6:36 pm

Akshay

- Finished the dashboard generalization, Tumblr API posting, and the registration - "fill all fields" message.

Luke:

- The header was updated to be a part of the success message letting users know that the friend that was added could see their private listings now. For the remove a friend, a similar message was displayed to let the user know that the friend was removed and could no longer see the user's private listing.

Cameron

- Bug fixes were made for when a user edits or deletes listings. Users were now able to properly make changes to their listings and return to the page they came from.

Hannah

- This sprint was probably our best so far. We worked really efficiently and implemented all of the changes we needed to after getting our feedback from the user study.

Surya

- Sprint 3 went very well. According to our burn-down chart, we performed better than the ideal expectation. I believe each of us had little issues. We brought the issues to the group and figured out how to fix the issues. This really helped streamline the process.
